Which attribute would you like to work on the most from the Attribute Inventory?

Obedience

How will this attribute deepen your individual discipleship and help better prepare you for missionary service?

Learning to be more obedient will allow me to become more like Christ. Jesus Christ was obedient to Heavenly Father's plan. On the mission field, there's many rules that are there to protect you so if I learn to become more obedient, I'll be a better missionary.

Find and review the attributes related to your choice. Read each of the statements and scripture references. What are some personal things you can do to develop and achieve these principles?

A great example of obedience in the scriptures is 1 Nephi 3:7. It teaches that when we try our best to obey God, he'll help us even when his commandments seem difficult. Personally, I can get better at this by reading the scriptures more. I need to ponder them more. Sometimes, I get caught up with the worldly things that I push studying util the last minute. I need to fix that.

Three simple activities you will do to strengthen this attribute

1. Reading and pondering scriptures more
2. Finish my homework on time (don't procrastinate)
3. Listen to advice from others if I know it's good (like advice in the scriptures)

Day 7: Saturday

Daily Reflection

Saturday, I learned that things don't always go my way. It's hard but it's what's supposed to happen. I pray to God that whatever happens, happens for a reason which comforts me to know this was supposed to happen. I still want to improve with my studying.
